

## ENGINEERED SYSTEMS

### Slide Bed Kit

C & C Hydraulics are the leading supplier of hydraulic equipment into the recovery vehicle market sector in the UK and we also export slide bed systems to a number of overseas countries.

We offer the customer a number of advantages:

- We design and manufacture the hydraulic cylinders in house and have a special CNC machine tools for providing long stroke cylinders with up to 5.5 meters of stroke.
- We can provide the complete hydraulic system in one kit of parts saving customers both time and money.
- We have a standard range of products and can provide fast delivery times.
- Because of our experience we can provide technical support and advice ensuring the correct system is supplied to suit the application.

We also have two solid works 3D CAD seats and have worked closely with customers to develop new products, an example of this collaboration has led to the development of a revolutionary low approach slide bed system.
